

# USER EXPERIENCE DESIGN AND USABILITY

Design is not just what it looks like and feels like. Design is how it works." – *Steve Jobs*

---

## Submission document for Final Project

Please DOWNLOAD this document and complete a copy of it to submit your assignment.

It is a Google Doc that you can open in MS Word or Google Docs after your download.

Fill out this document as directed below and save it as **one** PDF

Name the PDF "*YourLastName\_YourFirstName\_Final.pdf*"

Submit the entire PDF in the assignment in Canvas before the deadline.

If submitting a PDF portfolio, insert your full portfolio PDF at the end of this file.

If submitting a UXfol.io or online portfolio link, paste it at the end of this document.

NOTE: If you opt to do a virtual interview presentation, and are submitting a .mp4, be sure to attach the .mp4 file (as well as this PDF) in Canvas.

---

### Part 1: Portfolio checklist

Use the checklist below to confirm you've included all required elements in your portfolio. These are the minimum expectations — feel free to include additional items that help tell the story of your process.

**Each item should be supported by clear written commentary** that explains your design decisions and process.

- ☐ Project Introduction (1–2 paragraphs)
- ☐ Audience analysis (chart/table with sources), with appropriate written commentary
- ☐ Persona list, poster and one full empathy map with scenario
- ☐ Card sort results (photo(s) of sorts. Can also include class photos of sorts in progress)
- ☐ Site structure diagram or outline
- ☐ Two user flows with scenarios
- ☐ Hand sketches of wireframes (photographed)

- ☐ At least 10 grayscale/mid-fi wireframes (**Figma link** -- be sure it is shared appropriately)
  - ☐ Complete UI kit/style guide (color palette, fonts, 2+ components)
  - ☐ At least 20 interactive high-fidelity mockups (**Figma link** - be sure it is shared appropriately)
  - ☐ Three usability tests (**UserTesting.com links** - be sure links work)
  - ☐ Summary of insights gleaned from usability testing (approximately 150 words)
  - ☐ Design iteration notes (What changes were -- or were not made -- and why.)
  - ☐ Link to second set of high-fidelity mockups with changes made. (**Figma link** - be sure it is shared appropriately)
- 

## Part 2: Project reflection

In about 300 words, reflect on what you learned from this project and process. You may consider the following questions:

- What was the most valuable thing you learned during this project?
- What do you wish you'd explored or learned more about?
- What surprised you most during this process?
- What aspect of your work are you most proud of?
- If you had more time, what would you change about your work?
- How has this project influenced how you view UX or design thinking?

Feel free to include any other personal takeaways from this experience.

The most valuable thing I learned is the importance of user flows and card sorts. I had never done activities such as these before and it really helps you to step into the perspective of a user, outside of what you had in mind. I wish that I had learned more about the Jury-X internal application, but I know that it is confidential information for them and they may not want to share a ton of information on that. I feel like a big hurdle of this project was trying to understand what Jury-X was and what the user flow of an attorney is like. After I understood more about *voire dire* from researching, I began to understand more what my users might need. I was surprised by just how hard it is to make a dashboard. You want every element on a dashboard to mean something, but you don't want it to look sparse and empty either. I am most proud of my adaptability and problem solving in this project. For example, I wondered a lot about how to present the bias notes section, and I am happy with the results. If I had more time, I would probably make the interactivity more realistic. I would also make individual cards and fill out the information for all the parts.

### Part 3: PDF file, portfolio link or UXfol.io link

If submitting a PDF of your portfolio, combine the portfolio PDF of this file.

If submitting a link, please the link below this box. **Be sure the link is functional and working.**

gregorio\_final.pdf

gregorio\_final\_presentation.mp4

Note: the slide deck I show in the recording is a little bit different from the one linked because I added in 150 word reflections about each user test after recording.

Note 2: I am also very sick and have had a sinus infection for the past 2 weeks so sorry if I sound slow or weird/ congested. 😞
